Dang Ngoc Tram

Fullstack .NET Developer

Dob: 07/06/1997

Gender: Male

Phone: +84968598259

Email: tramdk1997@gmail.com

Website: https://tramdk.github.io/landing-page/

Address: Phu Nhuan district, Ho Chi Minh City

PROFESSIONAL SUMMARY

Results-driven Fullstack Developer (.NET + Angular) with 5+ years of experience delivering high-performance, scalable enterprise applications. Proven expertise in .NET Core / .NET 8, Angular, and microservices architecture, with a strong track record of optimizing large-scale systems and integrating AI-powered solutions.

Skilled at bridging business and technology by working directly with stakeholders to translate requirements into robust, user-centric systems. Passionate about building high-impact products, improving system performance, and leveraging modern technologies to drive innovation.

CORE SKILLS

Front-end	• Angular, AngularJS • HTML5, CSS3, JavaScript, TypeScript • UI/UX performance optimization • Component-based architecture
Back-end	• .NET Core, .NET 8, ASP.NET Web API • LINQ, Entity Framework (EF Core), ADO.NET • RESTful API design & development • SignalR (real-time systems)
Database & Search	• SQL Server, PostgreSQL, MySQL, MongoDB • Query optimization for large datasets (Big Data) • ElasticSearch
Architecture	• Microservices Architecture • MVC, N-Tier, Repository Pattern, SOLID • Docker, Kubernetes (K8s), CI/CD (Jenkins) • Redis Cache
Advanced Expertise	• System performance tuning (Frontend + Backend + DB) • AI integration in enterprise systems • Scalable system design & distributed systems

PROFESSIONAL EXPERIENCE

2020 - 06/2025

Lac Viet Computing Group

Software Developer

- Client Engagement & Product Enhancement: Engaged directly with clients to gather, analyze requirements and feedback for continuous product improvement. Provided technical

support and resolved user-reported issues to ensure high levels of customer satisfaction.

- System Performance Optimization: Specialized in analyzing and resolving performance bottlenecks, with a key focus on optimizing query speeds on large-scale data systems (Big Data) to enhance the overall user experience (UX).
- Advanced Feature Development & Integration: Designed, developed, and successfully integrated complex modules into the software, including dynamic reporting systems, interactive data dashboards, and AI-powered analytics tools.
- Research & Core Component Development: Proactively researched, evaluated, and implemented third-party libraries and technologies to build robust and reusable core components for the software platform.

KEY PROJECTS

2022 - 06/2025

ERP System

Fullstack Developer

- Team size: 20.
- Responsibilities:
  - Developed scalable UI component systems and customized enterprise UI libraries (Syncfusion)
  - Built and optimized reporting services and reporting UI platforms
  - Designed and implemented file management services
  - Developed data pipelines and integrated AI-driven analytics systems
  - Built robust backend APIs and business logic for enterprise workflows
  - Contributed to a microservices-based architecture deployed in containerized environments
- Technologies: C#, .NET 8, SignalR, Linq, EF Core, PostgreSQL, MongoDB, Angular, Microservice, Redis Cache, ElasticSearch, Docker, Kubernetes (K8s), Jenkins.

2020 - 2022

Document Management System

Fullstack Developer

- Team size: 5.
- Responsibilities:
  - Gathered and analyzed business requirements from clients
  - Migrated legacy data into modern systems with high accuracy and reliability
  - Optimized complex SQL queries, significantly improving performance for large datasets
  - Developed new features and resolved system issues to ensure stability
  - Enhanced UI/UX performance for better user experience
- Technologies: C#, .Net Core, ADO.NET, SQL Server, AngularJS, ElasticSearch.

EDUCATION

2015 - 2020

Ho Chi Minh University of Technology

Information Technology

Degree: Bachelor of Engineering

KEY ACHIEVEMENTS

- Improved system performance and query execution time for large datasets
- Successfully delivered enterprise-scale ERP system with AI integration
- Built reusable components that accelerated development across multiple projects

- Consistently recognized for problem-solving and performance optimization expertise

ADDITIONAL INFORMATION

- Strong problem-solving and analytical thinking
- Fast learner with a passion for new technologies
- Interests: Technology, AI, Music, Gaming
